## **ANDROS**

RESEARCH AND STATISTICS DEPARTMENT BAHAMAS MINISTRY OF TOURISM 2013

The island of Andros is the largest island in the Bahamas and lies west of the island of New Providence and south of Bimini and the Berry Islands. It is approximately 2,300 sq. miles or 104 miles long and 40 miles wide. The population of Andros is approximately 8,000 and is small compared to the size of the island. Much of the water used in the island of New Providence and other islands in the Bahamas is barged in from the island of Andros.

The island of Andros has a rich history. Some of the residents of the island were descendents of Seminole Indians and Seminole Blacks who settled in Red Bays, Andros Island after migrating from Florida because of the oppression that they felt there. The talent of the people of Red Bay which includes many of these Seminole descendents is famous. Red Bays, Andros is known for its internationally renowned authentic basket weaving and wood carvings some of which are now on display in the Smithsonian.<sup>3</sup> Many of the people in Red Bays live off the land by farming their own food, fishing and crabbing and following the traditions of their ancestors. In addition to the descendants of the Seminoles, the Mennonites out of the United States have set up a farm where they grow fruits and vegetables and make honey from the bees. The Mennonites also operate a carpentry shop where they build furniture, etc. and a mechanic shop where they fix cars.<sup>4</sup>

The island of Andros is not like any other island in the Bahamas. Visitors to the island have a plethora of activities that they can enjoy. They can go bone-fishing, diving, snorkeling, bird-watching, deep sea fishing, sailing, kayaking, windsurfing, or go on nature or eco-tours.

Andros is a sports enthusiast's paradise and is the ideal dream of the visitor who wants to escape from everyday life to a bone-fishing, diving, and snorkeling paradise. Andros is known as the "Bone-fishing Capital of the World." The bone-fishing flats of Andros are well known among the Fly Fishing aficionados and Anglers of the world and are thought to be some of the best for fly fishing and angling. Andros is also great for deep sea fishing. Fish like Wahoo, tuna, mahi-mahi, dolphin, marlin and snapper abound off the coast of Andros.<sup>5</sup>

In addition to the bone-fishing flats of Andros and the deep sea fishing opportunities that abound on the island, there are many underwater attractions that attract visitors to the island from all over the world. Visitors to Andros can dive in the beautiful underwater world and swim through the underwater caves of the island. The cerulean water off the island of Andros is the home of the third largest barrier reef in the world. This reef is resplendent with coral, sponges and underwater wildlife. The waters off Andros Island are also home to the Tongue of the Ocean (6,000 ft in depth and 100 miles long) which is a very deep canyon in the ocean floor between the islands of New Providence and Andros. The Andros Barrier Reef and the Tongue of the Ocean are spectacular sites to visit for divers who want to explore a whole new world under the sea.

Andros is an eco paradise for all of the eco enthusiasts who have already discovered the natural eco system of the island. In addition to the natural underwater eco-system Andros has blue holes, mangroves and marshlands all over the island. The

<sup>&</sup>lt;sup>6</sup> Wikipedia, the Free Encyclopedia

island has iguanas, wild boars, land crabs and a myriad of birds. Andros is also an ideal island to enjoy bird-watching. Birds like flamingoes, hummingbirds, ibis, spoonbills, the Bahama Parrot, Woodstars, "the West Indian Woodpecker, Loggerhead Kingbird, LaSagre's Flycatcher, the Great Antillean Pewee, the Bahama Swallow, the Bahama Mockingbird, The Red-legged Thrush, the Thick-billed Vireo, the Black-whiskered Vireo, the Olive-capped Warbler, Kirtland Warbler, the Bahama Yellowthroat, the Black-cowled Oriole, the Great Antillean Bullfinch, the Black-faced Grassquit, the Melodious Grassquit, the Least Grebe, Olivaceous Cormorant, the Flamingo, the Bahama Pintail, Osprey, Kestel, Sooty Tern, Roseate Tern, Noddy Tern, White Crowned Pigeon, Zenaida Dove, White-bellied Dove, the Key West Quail Dove, the Great Lizard Cuckoo, the Smooth-billed Ani and the Cuban Emerald Hummingbird" can be discovered in the forests and near the mangroves in Andros.<sup>7</sup>

Andros is home to the International Field Studies Organization field station and the Atlantic Undersea Testing and Evaluation Centre (AUTEC). The International Field Studies Organization is a "public non-profit scientific and educational organization established in 1970." The Forfar Research Field Station which is a part of the International Field Studies Organization is a field training facility for High-school and college students who are conducting field research in education and the sciences. "Andros provides an outstanding environmental setting for a weeklong (or longer) program. Studies such as marine biology, archeology, oceanography, botany, ornithology, ecology, tropical studies, etc. can be covered in a broad overview or broken into individual topics." Andros is also home for the Atlantic Undersea Testing and Evaluation Centre (AUTEC) which conducts extensive underwater testing for the US Navy antisubmarine research programs. Because of its natural eco-system and geological makeup Andros is also known to have the potential to be great as a carbon sink. Carbon sinks absorb CO2 out of the atmosphere. Scientists are researching Andros' potential as a carbon sink now.

#### 1. Why Did Stopover Visitors Come to Andros?

- Approximately three in four (74%) stopover visitors came to Andros for a vacation;
- o 13% of them came to Andros for other reasons;
- 3% of them came on a business trip;
- 3% came to visit friends and relatives;
- 2% came to attend a honeymoon.
